PROFESSIONAL SUMMARY

Third-year Computer Engineering student specializing in Backend Development and AI Engineering. Experienced in building RESTful APIs with FastAPI, designing RAG pipelines, and deploying containerized applications on AWS EC2. Proficient in Data Science (Pandas, NumPy) and Deep Learning concepts.

TECHNICAL SKILLS

- Languages: Python, C++, Java, C, SQL, HTML/CSS, Bash Scripting
- AI & Data Science: LLMs, Deep Learning, Neural Networks, Pandas, NumPy, Matplotlib, LangChain, RAG, ChromaDB, HuggingFace, OCR (Pytesseract)
- Backend & Cloud: FastAPI, Flask, RESTful API Design, Docker, Docker Compose, AWS (EC2), Linux (Ubuntu), Git, Postman, Ollama, Groq API

PROJECTS

CivicConnect | FastAPI, Docker, AWS EC2

- Engineered a scalable civic issue-reporting backend handling image uploads and geolocation data.
- Implemented duplicate detection logic using coordinate radius matching and text similarity.
- Containerized the stack with Docker Compose and deployed on AWS EC2 for production use.

Hybrid OCR-Enabled PDF RAG Chatbot | LangChain, ChromaDB, Streamlit

- Architected a RAG pipeline to process digital and scanned PDFs via pytesseract and pdfplumber.
- Implemented vector similarity search using ChromaDB and HuggingFace embeddings.
- Optimized inference using a dual-inference workflow (Local Ollama + Groq API) for low latency.

AI Interview Copilot | Python, LLMs, Pandas

- Automated resume and LinkedIn analysis to generate structured pre-interview reports.
- Utilized Pandas for structured data handling and LLMs for contextual insights.

GlideView (Prototype) | Sensor-Based Stabilization

- Explored motion stabilization techniques for document reading during transit.
- Processed gyroscope sensor data using filtering logic to reduce motion instability
- Focused on performance optimization and memory-efficient rendering

Additional Projects

- GestureX – Hand gesture-based UI controller using MediaPipe, OpenCV, and PyAutoGUI
- TaskBoard – full-featured task management tool that blends design, function, and focus.

EDUCATION

B.E. Computer Engineering | 2023 – 2027

Smt. Kashibai Navale College of Engineering, Pune
CGPA: 9.12/10.0

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.
- Postman API Fundamentals Student Expert.
- LeetCode: Solved 150+ problems focusing on Data Structures and Algorithms.
